Launch

## Business Overview

**CareGlider is in position to energize the wheelchair industry** with a new generation of lightweight electric powered wheelchairs that address the unmet needs of 250 million global caregivers. CareGlider will enhance quality of life for the aging population while simultaneously yielding an uncommonly high return for our valued investors.

## Problem At Hand

**Half of Americans over 50 are now caregivers. 63% face mortality before the person they care for. (NIH)**  
**Powered wheelchairs are ineffective for caregivers.**

They were not intended for caregiver use

**Powered wheelchairs are too heavy to transport.**

Attached motors add significant weight

## Market

The growing elderly population and over **53 million US caregivers assisting 19 million Americans** with mobility challenges **represent a massive opportunity** for an innovative mobility solution that relieves manual transport effort, promotes caregiver longevity, and prolongs the ability to age-in-place.

## CEO

**David Carson is a med tec innovator, entrepreneur, and investor, leading breakthrough technologies to market for 30 years** resulting in successful launches, exits, and licensing deals, generating 9 figure cumulative revenue.

## Traction

- **Beta testing and market validation are complete.**
- Market need and willingness to pay have been confirmed.
- PDAC and 510K approval testing is 90% complete.
- Regulatory testing is entering final stages.

## Launch

- A lean B2B launch strategy will leverage an established distribution network providing immediate access to 200 US online retailers, and 600 US distributors.

## Investment Offering

**Private offering securities to issue:**

- **Aggregate proceeds 1.5MM**
- Series Seed II preferred stock
- \$9MM post (minimum check \$25k)
- Breakeven target year 1
- Exit target year 3
- ROI target 10X
